PROFESSIONAL SUMMARY

Detail-oriented Computer Science student and aspiring Business Analyst with hands-on experience designing AI-driven automations, chatbots, and end-to-end workflow systems. Skilled in translating business requirements into working technical solutions using n8n workflow automation, Claude AI (connectors, skills, agent building, prompt engineering), and full-stack development. Strong analytical and problem-solving foundation combined with practical experience across the system lifecycle, from requirements gathering to deployment. Adept at cross-functional collaboration, process documentation, and continuously learning new technologies to improve efficiency.

CORE SKILLS

- AI & Automation: n8n workflow automation, Claude AI (connectors, skills, agent building), prompt engineering, chatbot design & development, AI agent orchestration, LLM integration
- Business & Analysis: Requirements gathering, process mapping, systems documentation, stakeholder communication, Microsoft Excel, Microsoft PowerPoint, Microsoft Office
- Technical: Python, Java, C++, JavaScript, HTML & CSS, REST APIs, relational databases (Oracle)
- Languages: Arabic (native), English (fluent), French (fluent)

PROFESSIONAL EXPERIENCE

IT Support Intern — BIMPOS

Jun 2025 – Oct 2025

- Provided technical support and troubleshooting for hardware, software, and network issues, resolving user-reported problems and minimizing downtime
- Assisted with system maintenance and user account management, supporting smooth daily IT operations across the organization
- Gained hands-on experience in customer support and technical problem-solving within a professional business environment

PROJECTS

AI Career-Matching Platform — Personal Project

- Designed and built an AI-based system that analyzes applicant CVs to extract skills, experience, and preferences, then matches candidates to the best-fit roles based on desired position and expected salary
- Applied prompt engineering and automation logic to convert unstructured resume data into structured, actionable job recommendations

Personal Portfolio Website with AI Recruiter Chatbot — Personal Project

- Built a personal portfolio website featuring an embedded AI chatbot that answers recruiter questions about my background, skills, and experience in real time
- Designed and deployed the chatbot's backend using n8n workflow automation, connecting a large language model, conversation memory, and a webhook API to the site's front end
- Implemented the front end using modern web development practices; deployed on Vercel

Hospital Management Mobile Application — Personal Project

- Developed a mobile application to improve hospital management and patient care, enabling doctors and patients to securely sign in, manage appointments, and access medical records and lab results
- Built features for hospital room reservations, specialist selection, multi-method payments, emergency SOS requests, and hospital location mapping
- Implemented using Android Studio, Oracle Database, and a RESTful API, including dedicated dashboards for hospital staff

EDUCATION

Bachelor's in Computer Science — Lebanese University, Faculty of Sciences, Beirut, Lebanon

2023 – 2026

- GPA: 92 / 100

Baccalaureate, General Science — Collège Saint Joseph des Sœurs des Saints Cœurs, Ain-Ebel, Lebanon

2020 – 2023

LEADERSHIP & ACTIVITIES

Troop Leader (Cheftaine Éclaireuses) — Scouts Du Liban – Saint Georges Rmeich

2024 – Present

- Organized camps, hikes, and scouting events for youth groups

Active Member — Scouts Du Liban – Saint Georges Rmeich

2011 – Present
